

THE RED IS THE SEEDS.

Fruit Basket is a shelf of emulators, one fruit for each console. Every fruit is drawn in ink on paper. Its seeds are the only red on it, the same spot red that marks a selection.

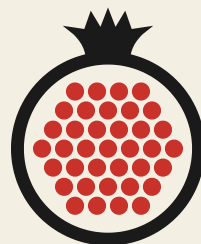

- 1 One fruit for each console, chosen for something true about the machine.
- 2 Ink draws the fruit. Red is only ever its seeds: points, never a fill.
- 3 A console whose dots you can see gets a pixel fruit, at whole-number scales. A console drawn at window resolution gets a sharp one.
- 4 The mark shows only where no game is: the app icon, the site, an empty library.
- 5 Console names stay out of the marks. The fruit is the name of the program.
- 6 A recompiler is a preserve, made from its console's fruit. Pomegranate, pressed, is Grenadine.

FRUIT BASKET

EMULATORS AND RECOMPILERS · ONE FRUIT FOR EACH CONSOLE

01 PS2 · DISCS

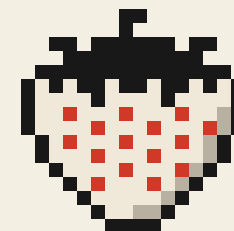

POMEGRANATE

Seeds on the inside. A smooth skin over hundreds of seeds in separate chambers, the way the console packs a handful of processors under one lid.

pomegranate · .chd .iso · sharp at any size

02 GBA · CARTRIDGES

STRAWBERRY

Seeds on the outside, every one in plain sight, like a screen you can count the dots on. In Japanese, ichigo also reads as one-five: fifteen-bit colour.

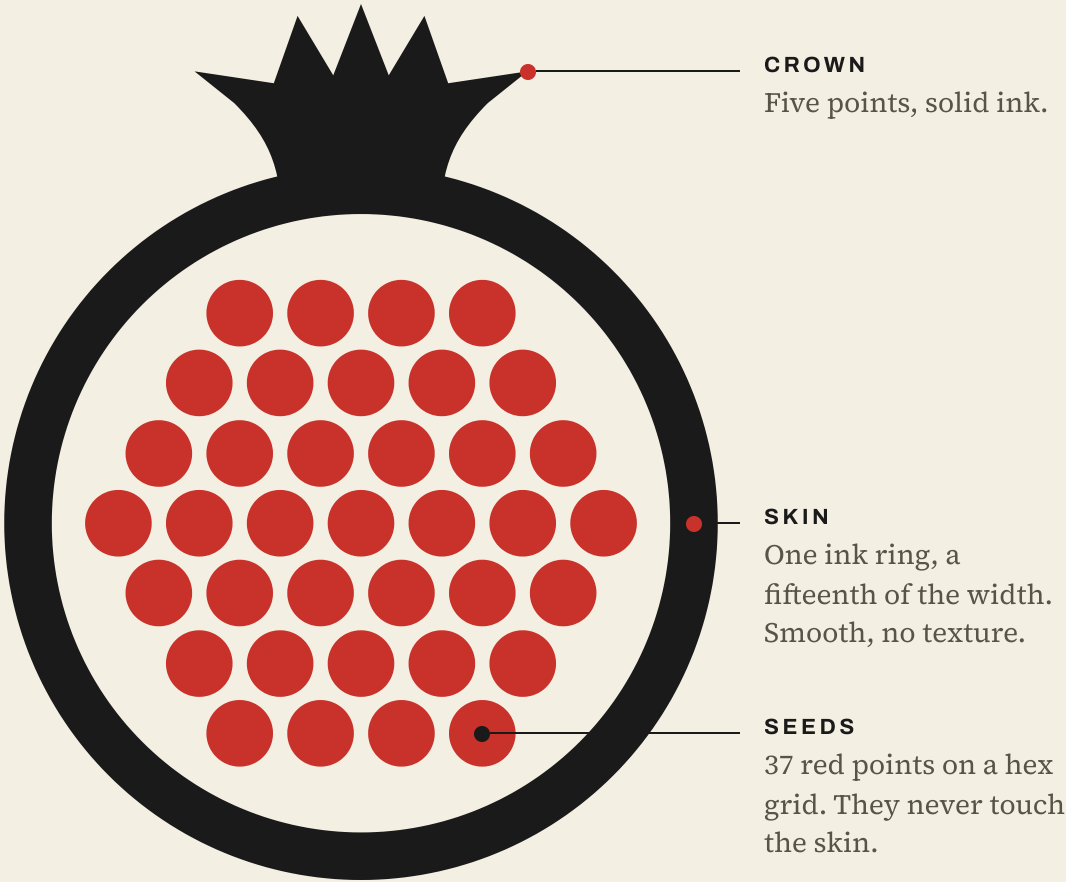

strawberry · .gba · 16 × 16, whole-number scales

03 PS2 RECOMP · PRESSED FROM 01

GRENADINE

Pomegranate, pressed. The same seeds in rows, bottled as a native program.

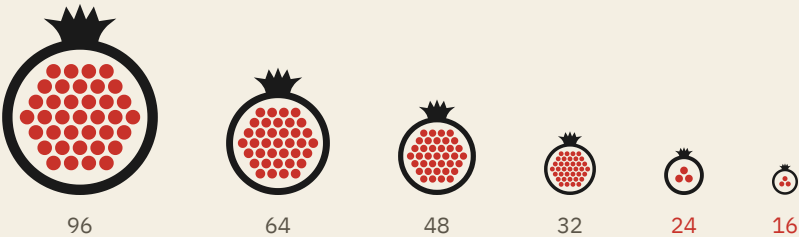

LOCKUP
